

## TEKNİK PLASTİK SEALED AIR JOINT VENTURE IN TURKEY

In 2007, Teknik Plastik and Sealed Air established a joint venture. The new company is today one of the largest food packaging companies in Turkey, positioned as a leader in consumer products such as printed and unprinted cups and lids for dairy products, chocolate spread and catering products. Thanks to the merger with Sealed Air, Teknik Plastik has now further expanded its product portfolio to include the large range of Cryovac® products distribution in Turkey.

Teknik Plastik remains today the only producer of cups, lids and trays with a full offer in the region. The company offers large capacity and a strong financial background. After more than 40 years of market experience as the best established thermoformer in Turkey, the company benefits from a solid basis of long term customer relations and strongly focuses on sustainable growth and innovation, launching a new product on the market every year. With 205 employees, the Teknik Plastic Sealed Air plant operates 24/7.

Sealed Air is a leading global innovator and manufacturer of a wide range of packaging and performance-based materials and equipment systems that serve an array of food, industrial, medical, and consumer applications. The company operates over 100 manufacturing facilities worldwide with more than 17,000 employees. Reaching nearly 80% of the world's population, many Sealed Air brands are among the most respected names in their markets.

Cryovac®, the food packaging arm of Sealed Air, is a world leading innovator in flexible and rigid packaging materials, systems and services for fresh, frozen, smoked or processed meat, poultry, fish and seafood, cheese and dairy products, bakery products, fruits and vegetables, pizzas, ready meals/foodservice and processed foods.
